

### REMARKS

The Examiner's allowance of claims 38 and 40-42 is acknowledged and appreciated.

Claims 7 and 10 stand rejected under 35 U.S.C. § 112, second paragraph, as being indefinite. Claims 7 and 10 have been amended to more clearly describe the photo-sensitive resin layer. Withdrawal of the rejection is respectfully requested.

Claims 1, 2, 5-8, 10, 30, 32-34 and 36-37 stand rejected under 35 U.S.C. §102(b) as being anticipated by Tsuda et al. (US 6,262,783). Applicants respectfully traverse this rejection. Independent claims 1, 2, 8, 30 and 34 and some of their respective dependent claims have been amended to recite features relating to the distribution of thermal shrinkage characteristics. Applicants believe that the claims as amended now include the allowable subject matter of claim 38. Accordingly, all pending claims are now believed to be in condition for allowance.

Applicants point out that Figs. 28, 34, 41 and 43 show features that are not claimed in the present application. More specifically, Figs. 28 and 34 relate to the distribution of inclination angles of reflection layer, and Figs. 41 and 43 relate to reflection bump shapes. Moreover, Figs. 57A-57E relate to a conventional process, while Figs. 57F-57G are directed to the subject matter of the present application.

For all of the above reasons, Applicants request reconsideration and allowance of the claimed invention. The Examiner should contact Applicants' undersigned attorney if a telephone conference would expedite prosecution.

Respectfully submitted,

GREER, BURNS & CRAIN, LTD.
